AtlasAUDITOR™
Pre-employment Screen Software

AtlasAuditor™

Making sure your pre-employment screen results add up

You put a lot of effort into building your physical function pre-employment screening process. What if your program isn't working like you'd hoped? AtlasAuditor™ can help make sure it is.
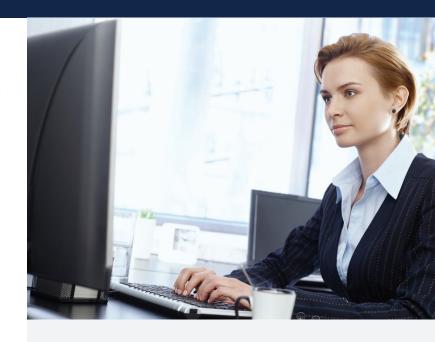

Better Reports = Better Results

AtlasAuditor™ can show you where your pre-employment screen program is succeeding and, more importantly, where it is not. The web-based solution analyzes screening data, matches it with actual results, and delivers customizable reports showing performance from both an operational and legal perspective.

AtlasAuditor™:

- Manages pre-employment screen data from all your test locations
- Provides an easy search tool by applicant name, test period, location or result
- Shows pass/fail rates by protected class, test steps, and test location
- Identifies applicant demographics
- Highlights EEOC compliance issues for faster resolution

With AtlasAuditor™, you get better data and better reports to help you quickly and effectively identify any program deficiencies and make changes before regulatory, recruiting, or other problems arise.

Simple Access Makes Things Simple

AtlasAuditor™ is designed to provide easy online access for screen sites, your staff, and your client staff. We help you manage data and provide reports without the time, effort, and paper your current approach may require.

A Total Solution

Do you need assistance with developing a legally compliant program or finding distant screen sites to support a client? Atlas can work with you to fill in the missing pieces and provide A Total Solution for you and your clients.
